

CONNOR BAKER

APPRENTICESHIP, JAMIE SWINNERTON ELECTRICAL

Why did you choose to do an apprenticeship? I chose to do an electrical apprenticeship because I was always interested in doing a trade and the electrical trade interested me the most because it seemed very technical and challenging.

What is your apprenticeship like? My apprenticeship is great; I love the work I do and I have learnt so much in such a short amount of time. Everyday is normally different work which I think is great because I don't get bored doing the same thing every day. My apprenticeship includes everything from running underground cables, wiring a house, fitting off lights, power points, fans, etc. We also do commercial work from big sheds and recently did the electrical work in the new EB Games in Albury.

What personal skills have you developed from your apprenticeship? I have developed many skills from my first year of my apprenticeship from leadership, (teaching work experience kids), initiative, (making decisions without asking my boss) and working on my own when my boss isn't there. I also go to TAFE and that has been a challenge but I look forward to it every week, I have made heaps of new mates and worked hard to pass my assessments.
