

OLLIE GREENHILL

CARPENTRY APPRENTICESHIP, LIV DESIGNS

Why did you choose to pursue an apprenticeship in carpentry? I chose carpentry because I like being hands on and it really interests me and you can gain valuable knowledge from it.

What is your apprenticeship like? It's really interesting, we do a whole range of things, we mainly do renovations so we do framing, plastering, tiling and heaps more. I'm learning heaps!

What personal skills have you developed from your apprenticeship? I think I've become a lot more responsible and mature through my job because sometimes I get left alone to do a job and I think that is a pretty big responsibility.

Highlights from your apprenticeship so far? The biggest highlight was getting the apprenticeship, it was awesome to start working and earning some money. And also all the skills I have picked up along the way.
